BREAKZONE BOWLING

TOURNAMENT-2/23

ENGINEERS' BALL-2/25

REMEMBERING TO RECYCLE

Author: Sid Somashekar

As students, we tend to produce a lot of trash and waste from food, drinks, paper supplies, etc. Among the waste that comes from food, some examples include the cardboard boxes that we get our food in, the cups we get from getting coffee, or the bottles we get our refrigerated drinks in. Most of us may just throw away whatever we use in the garbage and don't take another look. But, a lot of this waste can be recycled. As residents of nature, we should look to take more responsibility for our environment and look to either reduce or recycle our waste. Many disposable containers have the recyclable symbol on them, which is an indication of whether or not that container is recyclable.

Many of our waste bins around campus are labeled thoroughly, indicating which bin is for recycling, waste, etc. We should take the extra second to categorize our waste and dispose of them accordingly. In an attempt to reduce waste, we can use reusable water bottles and cups instead of buying bottled drinks all the time. Many students buy large metal water bottles/flasks that are insulated in order to preserve temperature. We can also make our own food and use reusable containers to store our food. Buying a tablet may be a little expensive, but it will cut down your paper costs almost completely. Not having the need to use a pen or pencil may also be another incentive to switch to electronic note-taking instead of notebooks.

SWE PRE-CAMEO EVENT

Author: Kiara Klevar

Are you looking to meet with industry professionals? Make connections with employers?

Evening With the Industries is a reception hosted by the Society of Women Engineers at Virginia Tech. It will be held as a prelude to the CAMEO CareerFest 2023 and will give engineering students at Virginia Tech an opportunity to meet and converse with corporate representatives. This event is open to members of every engineering organization on campus but is primarily designed for minority engineering student groups. This event is aimed to bridge the gap between industry and

students while offering companies an opportunity to meet and recruit some of the most active engineering students on campus.

This will give you an opportunity to get real experience with company representatives. The event will prepare you for CAMEO Careerfest on February 23, 2023. In addition, there are Hors d'oeuvres and light refreshments. This event is from 6 pm to 8 pm on February 22, 2023, at Lane Stadium. You can sign up at:
